Innovation and Technology Intern

VIRTUAL STUDENT FEDERAL SERVICE

V S F S

Project Title	Innovation and Technology Intern
Project Summary	Are you excited about the intersection of technology, data, and innovation and what it means for the future of intelligence? Then, this is the internship for you! We are seeking enthusiastic students who love data and technology and have strong research and writing skills.
Country	United States

Project Description

CIA is dedicated to creating a workplace culture in which critical thinking, creativity, and innovation are encouraged. As technology and innovation are closely linked, we're looking to enhance the digital and data literacy of our analytic workforce. We seek interns who can assist in identifying best practices from academia, government, and the private sector so that we may apply this research to advance our intelligence mission.

Our interns will research and draft creative blog posts to introduce analysts to new quantitative and qualitative analytic techniques, stay up-to-date with developments in technology and innovation, and better incorporate data visualizations.

Examples of projects include:

--> Investigate ways in which data analysis and visualization are spurring new approaches to analytic insight and handling large volumes of information.

--> Research, draft, and edit timely and accurate fact sheets, presentations, blog posts, videos, graphics, and podcasts related to innovation, creativity, and data and digital literacy for an internal CIA audience.

--> Support CIA staff in creating learning materials to promote data and digital literacy within our analytic workforce. Examples include identifying/creating short videos demonstrating how to make the most of common computer programs; writing blog posts about how to best incorporate data analysis into written products for our policymakers of the future; or creating a gallery of visualizations exemplifying data-drive storytelling.

Required Skills or Interests

Skill(s)

Analytical writing

Design thinking

Editing and proofreading

Educational design

Research

Storytelling/blogging/vlogging

Writing

Additional Information

None

Language Requirements

None
